The Green Industry Award is an appreciation given by the government to industries that have implemented green industry principles by paying attention to environmental friendly process technology. This activity is a form of non-fiscal incentive for manufacturing industry companies that have made significant efforts in the efficient use of material, energy and air resources. This Award Program is given to National Industrial Companies which are divided into 3 categories, Large Industries, Medium Industries, and Small Industries. The success of Pan Brothers and Group in winning the Green Industry award is a clear testament to the application of green industry principles throughout the company's operations.

Green industry-based management is the company's main commitment which is implemented in all production areas of the Company and the Group. the development of the green industry has become an icon that is in line with the desire for sustainable development. The green economy will direct the Indonesian economy to be more efficient in the use of limited natural resources and seek to improve environmental conditions that have been damaged due to uncontrolled exploitation of natural resources. This is also in line with Pan Brothers and Group's Vision, Mission and Sustainability Strategy which is based on three branches (Three Fundamentals - People, Planet, Profit), to create positive value for all stakeholders including our community, environment and business.
